This questionnaire is designed to enable institutions to assess: a) the openness of their research and teaching; b) the level of awareness of openness in their researchers; and c) the level of awareness and use by researchers of institutional support. It covers the whole process of undertaking and disseminating scholarly and scientific research, and teaching, including for instance awareness of and adherence to policies and strategies.

Scoring is either yes/no/don't know or on a scale of 0 to 4, where 0 signifies no compliance or implementation and 4 signifies full compliance or implementation.
